

Physical examination---contilia group

Modern healthcare concepts are all about preventing disease in the first place.

Exercise and a healthy diet are important preventive measures, as are regular check-ups of key organs such as the heart and lungs – to make sure that serious diseases can be detected at an early stage. Many hospitals and medical practices in Germany are specially geared to patients who visit the city for a course of medical check-ups. Offering everything from short routine examinations to full organ analyses, they offer outstanding service with no waiting times.

We cooperate with the greatest medical group in Germany-- Contilia group and launch the world's leading medical examination and testing service.

They have dedicated their lives to the care of the sick and those in need of care in many hospitals for More than 170 years ago. Today they have more than 7,200 employees work in hospitals, senior citizen facilities, outpatient services, medical centers, prevention, and early detection and rehabilitation facilities.
